*Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to a fractionator, classified in class 196, subclass 132.
- II. Claims 13-19, drawn to a fractionation process, classified in class 203, subclass 100.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another materially different apparatus such as: an apparatus designed in a stacked fashion; a quench system; a fractionating system and etc., as described by applicant, noting e.g., pages 6, and 9-10 of the specification. In like manner, the apparatus as claimed can be used to practise another and materially different process such as that further described by applicant e.g., at pages 4-5 of the specification.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification; and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1764

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
